

Properties

Material
Steel

Finish
Electro Zinc Plated GI /
Hot dip galvanized HDG

Applications

- Designed for suspending high load for variety of seismic applications.
- Body is made from special grade zinc materials which has excellent anti-corrosion properties.
- Eliminates the process of swaging and screwing the cable in the clip.
- Load capacity is achievable only in combination with wire cable.

Technical Data

Seismic Cable Restraint System

Item	Wire Size (mm)	Load Ratings (Kg)	Minimum Breaking Strength of wire clip (Kg)
SPSCC-01	1.0 - 1.5	50	75
SPSCC-02	2	60	90
SPSCC-03	3	120	180
SPSCC-04	4	210	315
SPSCC-05	5	280	420
SPSCC-06	6	360	540
SPSCC-08	8	540	810
